

3rd NABIAM Webinar:

ADDITIVE MANUFACTURING

Additive Manufacturing in R&D and production
in Austrian – Czech connected regions

When: **16. 9. 2021, 15:00–17:00**

Where: online (MS Teams)

Register: <https://forms.office.com/r/C9fR5Up2QD>

INNOVATIVE
& RESEARCH
NETWORK

Austrian-Czech cooperation network in the field of **Nanotechnologies – Biosensors – Additive Manufacturing (NABIAM)** is launching series of webinars presenting results of competence mapping in the cross-border regions of Austria and the Czech Republic.

The aim of these activities is to improve transnational collaboration due to notice about existing skills and infrastructures. Presenters from both industry and research area will present their R&D activities, available infrastructure, research needs and possible cooperation topics in the abovementioned areas.

KEY SPEAKERS:

Guillaume Clement / HARATECH

3D printing and medicine (current possibilities, hurdles and perspectives)

Michael Kainz / PROFACTOR

Biomaterial for Implants - Inkjet printable formulations

Libor Beránek / CTU

Additive Manufacturing of Metals

Jaroslav Jacak / FH OÖ

Additive Manufacturing in Medicine
